

BSc Business Information Technology

BSc Wirtschaftsinformatik

Andreas Reber

1 March 2024

BIT Team (Basel and Brugg-Windisch)

Programme Head

Prof. Dr. Michael Pütz
Peter Merian-Strasse 86
4002 Basel
Room: 3.25
Tel.: +41 61 279 18 42
michael.puelz@fhnw.ch

Deputy Programme Head

Christina Loosli
Peter Merian-Strasse 86
4002 Basel
Room: 3.04
Tel.: +41 61 279 19 09
christina.loosli@fhnw.ch

Assistant

Fabia Berger
Peter Merian-Strasse 86
4002 Basel
Room: 3.23
+41 61 279 17 03
fabia.berger@fhnw.ch

Administration

Pauline Arnault
Peter Merian-Strasse 86
4002 Basel
Room: 3.23
Tel.: +41 61 279 17 46
pauline.arnault@fhnw.ch

Administration

Sandra Koller
Bahnhofstrasse 6
5210 Windisch
Room: 5.4B06
Tel.: +41 56 202 72 74
sandra.koller@fhnw.ch

Studiengangleitung BSc Wirtschaftsinformatik

Prof. Andreas Reber
Leiter Studiengang
BSc Wirtschaftsinformatik (Olten)
andreas.reber@fhnw.ch

Prof. Dr. Rainer Telesko
Stellvertreter Studiengangleitung
BSc Wirtschaftsinformatik (Olten)
rainer.telesko@fhnw.ch

Bettina Willi
Assistentin Studiengangleitung
BSc Wirtschaftsinformatik (Olten)
bettina.willi@fhnw.ch

Patrick Weis
Sekretariat
BSc Wirtschaftsinformatik (Olten)
patrick.weis@fhnw.ch

BSc in Wirtschaftsinformatik / Business Information Technology

- Play an active role in shaping **digital transformation**
- Be the bridge between **business** and **information technology**
- Study in an **English-speaking international** environment

Manager

Data Analyst /
Data Scientist

IT Manager

IS / IT Auditor

IT Account
Manager

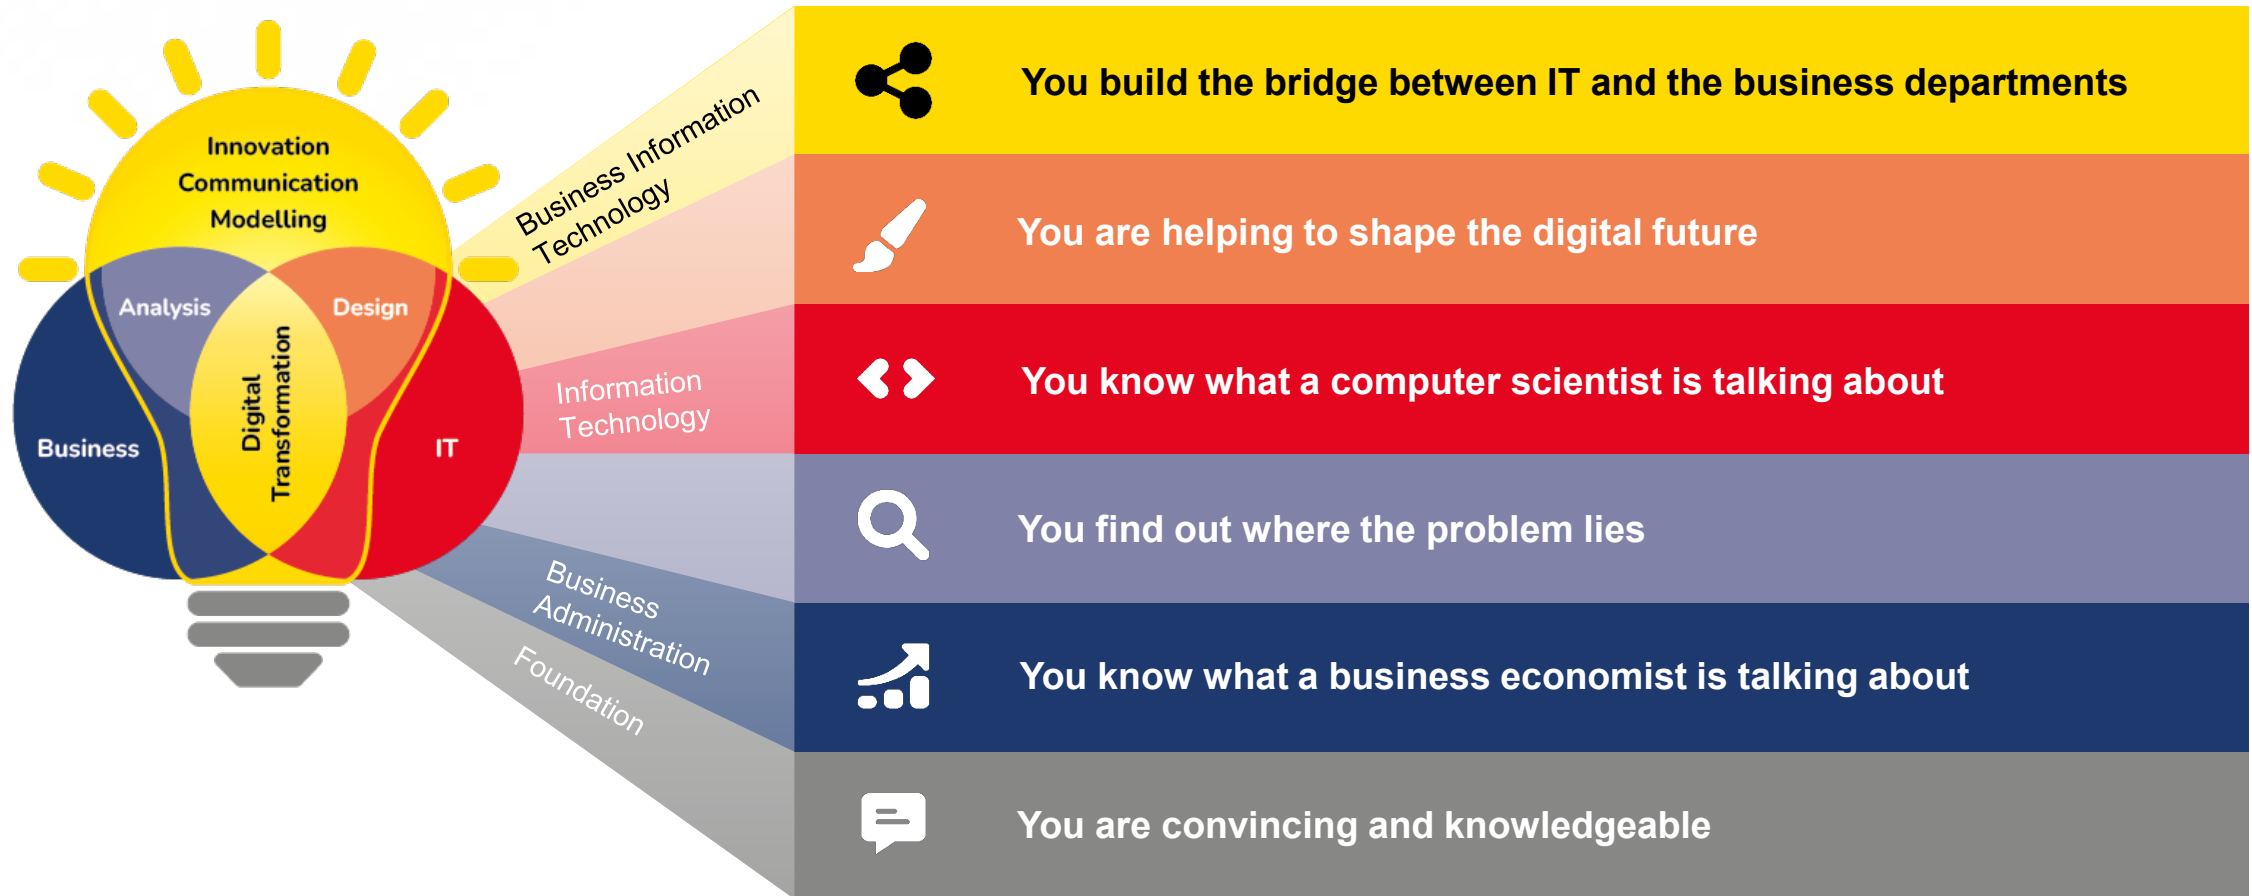

Blockchain Expert

... jobs not even
invented yet...

IT Entrepreneur

What is Business Information Technology?

Your advantages of the study program

Broad specialist and industry knowledge in business and IT

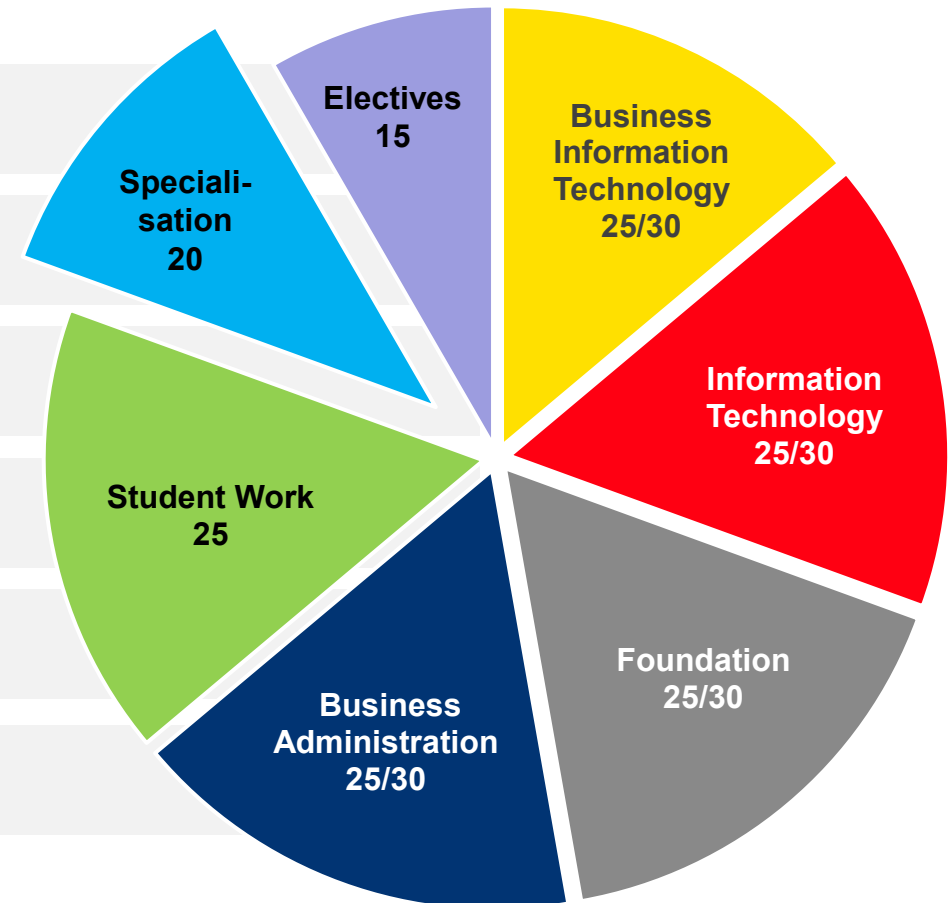

Specialisation in a sub-area of business information technology

> 1/3 of the program can be customized

Practical relevance - practical projects / case studies

Optional semester abroad in the full-time and part-time model

Wide range of career opportunities

Module overview BSc Business Information Technology / Full-time

1. YEAR		2. YEAR		3. YEAR	
1. Semester	2. Semester	3. Semester (→)	4. Semester	5. Semester	6. Semester
Business Communication 1 Professional written communication 5	Business Communication 2 Assertive oral communication 5	Business Maths 2 Foundations of data science 5	Statistics and Probability From data to insights 5	Specialisation 1. Modul 5	Specialisation 3. Modul 5
Business Maths 1 Logical and functional thinking 5	Accounting Balancing the books 5	Ethics and Law Behaving ethical and legal 5	Logistics and Supply Chain Management Managing the value chain 5	Specialisation 2. Modul 5	Specialisation 4. Modul 5
Principles of Management Managing the company 5	Economics Understanding the business environment 5	Corporate Finance and Controlling Financing the company 5	Business Intelligence Analysing data and managing information 5	Digital Business Models Digital transformation of the business 5	Corporate Strategy Business simulation game 5
Introduction to BIT Understanding the world of business IT 5	Business Process Management Designing and optimising processes 5	Enterprise Systems Understanding business applications 5	Topics in Business Information Independent research project 5	Practical Project Managing a real-world project 10	Bachelor Thesis Applying BIT knowledge to a real-world business challenge 10
Programming 1 Introduction to software development 5	Project Management Delivering successful projects 5	Database Technology Managing data 5	Internet Technology User-centric web app design 5		
Requirements Engineering Managing user needs 5	Programming 2 Advanced software development 5	IT-Security Securing the IT infrastructure 5	Electives (3rd Semester onwards) Individualise your studies		International Projects Beyond borders 3-5

(→) Ideal semester abroad

Specialisations

	Semester 5/7	Semester 6/8	
Software Engineering Leadership	Agile Application Lifecycle Management	Software Architecture	Technical focus
	Software Engineering	IT-Project	
Business Analytics	Machine Learning with Python	Time Series Analysis with R	Analytical focus
	Big-, Semi- and Unstructured Data	Analytics Project	
Cybersecurity Management	Data Privacy	Cyber Resilience	Risk focus
	Strategic Digital Management	Information Systems Auditing	
Digital Business Management	Digital Innovation & Design Thinking	Cyber Resilience	Management focus
	Strategic Digital Management	Information Systems Auditing	

Examples of BIT student projects

Adjusting enterprise IT cost-model for public cloud services

Requirements analysis and vendor evaluation for data governance

Migration and change management concept for a new intranet tool

Automated solution for pharmaceutical quality system

Developing an IT strategy

Requirements specification for a construction project software

Data visualization using Business Intelligence

Digital optimization of the sales process

AI to identify audit relevant documentation

Master data management through machine learning

Developing and testing data mining algorithms

Process optimization and digitalization

Semester Abroad

- We foster relationships with partner universities all around the world

Requirements

- Assessment passed
- Learning agreement

Academic Year

14 weeks

16 weeks
