

## Course Outline

Virtual Exchange Spring Semester 2022

### Course Title: Business Mathematics 2

Number of ECTS-Credits: 5

#### Format of the course:

- synchronous online course (FIX timeslots)
- asynchronous online course (NO fix timeslots)
- mix of synchronous and asynchronous online course
- synchronous hybrid course (students can choose online OR on campus in FIX timeslots)
- asynchronous hybrid course (students can choose online OR on campus in NON-fix timeslots)
- mix of synchronous and asynchronous hybrid course
- other, namely:

#### Number of Students accepted

- Total number of students is limited to
- Total number of students is unlimited
- Total number of virtual exchange students is limited to 3
- Total number of virtual exchange students is unlimited

Do Virtual Exchange students need an FHNW E-Mail Account for this course?  yes  no

#### Responsible lecturer: Patrik Christen

Link to lecturer's profile at FHNW: <https://www.fhnw.ch/en/people/patrik-christen> and <https://patrikchristen.com>

## Table of Contents

1. Course content.....	3
2. Learning objectives .....	3
3. Prior knowledge and entry requirements.....	3
4. Course structure and dates .....	3
5. Assessment .....	4
6. Literature.....	4
7. Grading .....	4

## 1. Course content

Linear algebra is introduced through the lens of complex systems and artificial intelligence. It covers the fundamental concepts of vectors and matrices, systems of linear equations, linear transformations, determinants, and eigenvalues and eigenvectors. The course forms the basis for many advanced and modern topics such as complex systems science, artificial intelligence, machine learning, data science, and cryptography. It follows a virtual flipped classroom and is therefore taught entirely virtual and involves a large portion of guided and autonomous self-study.

## 2. Learning objectives

Knowledge and understanding:

Students understand and are able to explain basic linear algebra concepts and are able to relate these basic linear algebra concepts to complex systems and artificial intelligence case studies. **(Obj. 2.1)**

Application of knowledge and understanding:

Students are able to solve respective exercises and discuss case studies. **(Obj. 4.1)**

Ability to make judgements:

Students can interpret solutions and justify assumptions of methods from linear algebra.

Communication:

Students can express, in own words, mathematical results of methods from linear algebra.

Self-learning skills:

Students can learn new concepts and methods from linear algebra.

## 3. Prior knowledge and entry requirements

- As this module requires participants to be able to discuss complex issues fluently, a good level of English is required min. B2/C1 (CEFR), IELTS 5.5, TOEFL iBT 46-59 or equivalent
- There are no further formal entry requirements for this course.

## 4. Course structure and dates

1	25.02.22 / 8 26.02.22 / 8	Live Online Meeting: Course Introduction Video: Motivation Vectors and Matrices Guided Self-Study: Vectors and Matrices	Coaching in Chat or Virtual Meeting
2	04.03.22 / 9 05.03.22 / 9	Guided Self-Study: Vectors and Matrices	Coaching in Chat or Virtual Meeting
3	11.03.22 / 10 12.03.22 / 10	Video: Motivation Systems of Linear Equations Guided Self-Study: Systems of Linear Equations	Coaching in Chat or Virtual Meeting <b>Deadline Assignment 1: Vectors and Matrices</b>
4	18.03.22 / 11 19.03.22 / 11	Guided Self-Study: Systems of Linear Equations	Coaching in Chat or Virtual Meeting
5	25.03.22 / 12 26.03.22 / 12	Video: Motivation Linear Transformations Guided Self-Study: Linear Transformations	Coaching in Chat or Virtual Meeting <b>Deadline Assignment 2: Systems of Linear Equations</b>
6	01.04.22 / 13 02.04.22 / 13	Guided Self-Study: Linear Transformations	Coaching in Chat or Virtual Meeting
7	08.04.22 / 14 09.04.22 / 14	Video: Motivation Determinants Guided Self-Study: Determinants	Coaching in Chat or Virtual Meeting <b>Deadline Assignment 3: Linear Transformations</b>
	15.04.22 / 15 16.04.22 / 15	Easter Break – No Class	
8	22.04.22 / 16 23.04.22 / 16	Guided Self-Study: Determinants	Coaching in Chat or Virtual Meeting

9	29.04.22 / 17 30.04.22 / 17	Video: Motivation Eigenvalues and Eigenvectors Guided Self-Study: Eigenvalues and Eigenvectors	Coaching in Chat or Virtual Meeting <b>Deadline Assignment 4: Determinants</b>
10	06.05.22 / 18 07.05.22 / 18	Guided Self-Study: Eigenvalues and Eigenvectors	Coaching in Chat or Virtual Meeting
11	13.05.22 / 19 14.05.22 / 19	Guided Self-Study: Eigenvalues and Eigenvectors	Coaching in Chat or Virtual Meeting
12	20.05.22 / 20 21.05.22 / 20	Live Online Meeting: Review, Evaluation, and Outlook	<b>Deadline Assignment 5: Eigenvalues and Eigenvectors</b>
	27.05.22 / 21 28.05.22 / 21	Buffer Time	
	03.06.22 / 22 04.06.22 / 22	No Class	
	10.06.22 / 23 11.06.22 / 23	No Class	

## 5. Assessment

- Assessment with (online)presentation, report, groupwork, test etc. during semester
- Final written test on campus can be replaced for remote students with an additional assignment
- Final written test on campus can be replaced for remote students with oral testing

## 6. Literature

Recommended reading: David Poole. Linear Algebra: A Modern Introduction. 4th Edition, Cengage Learning, 2015.

## 7. Grading

- Pass-fail
- According to swiss grading system (see below)

Mark	6.0	5.5	5.0	4.5	4.0	below 4
In words	excellent	very good	good	satisfactory	pass	fail

The student has the right to appeal against the grading within a period of not more than 14 working days after its communication. Any appeal must be sent to [io.business@fhnw.ch](mailto:io.business@fhnw.ch) in writing and must be accompanied by valid arguments. It will be handled according to the Study and Examination Regulations for the Bachelor of Science Business Administration at FHNW.
