Vision Statement

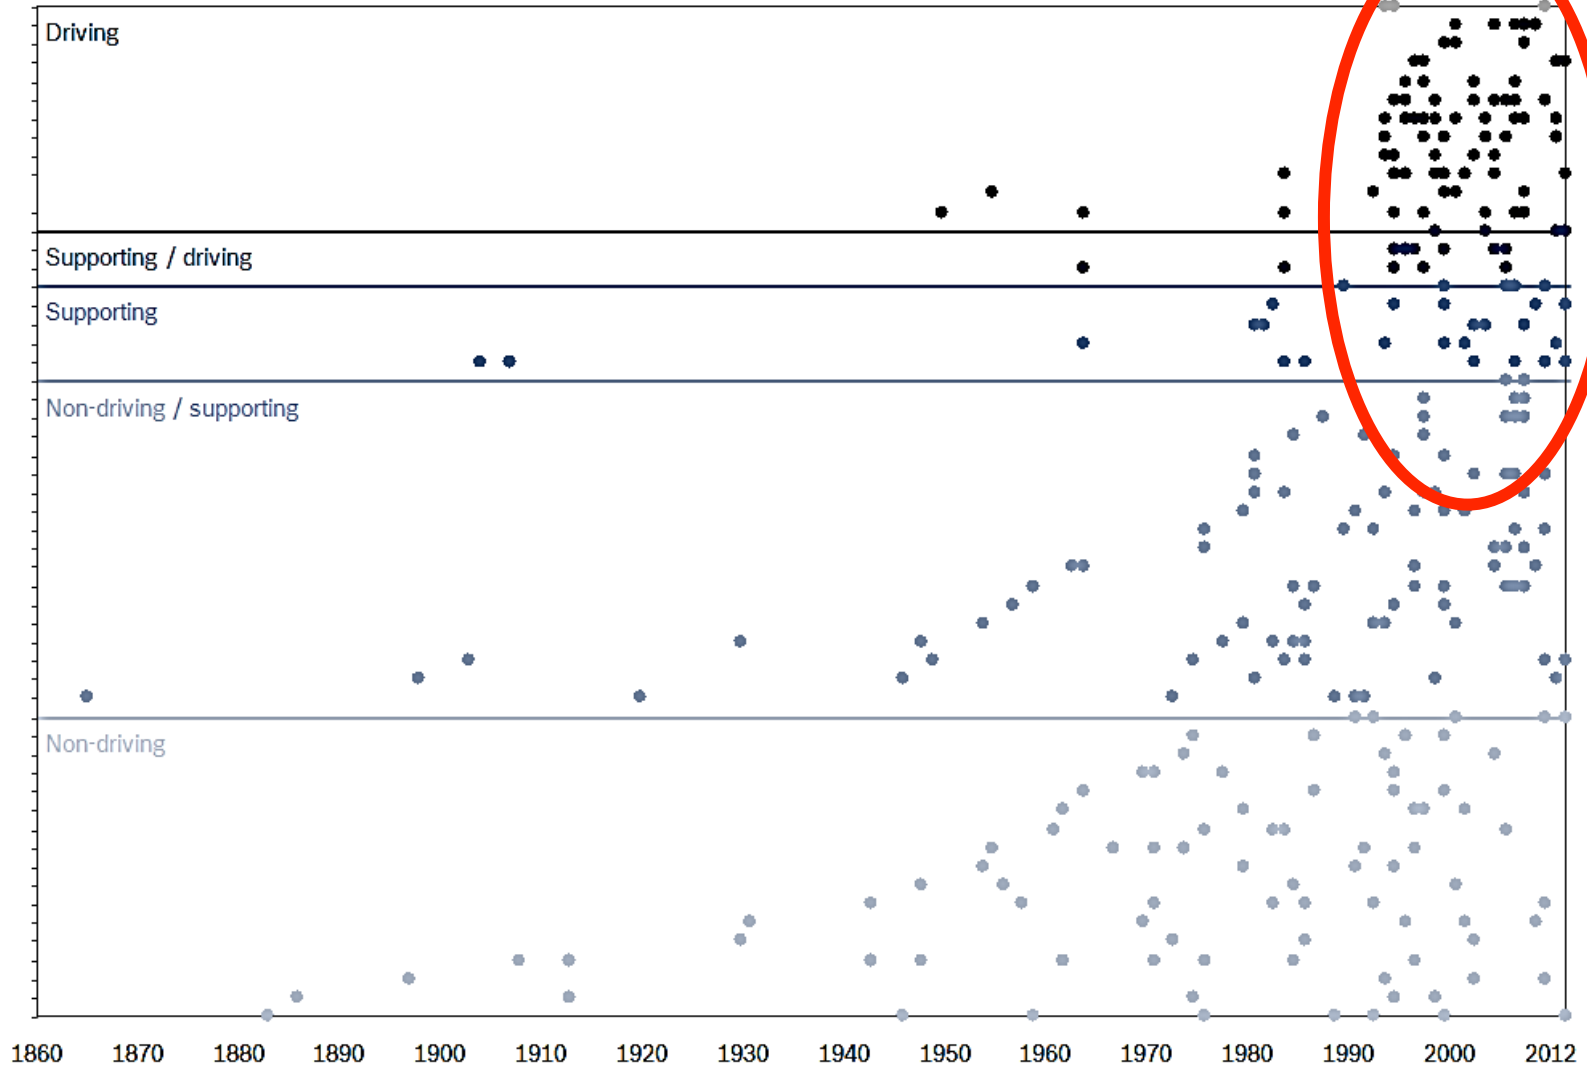

„Become #1 Service Cloud“

WHY?

How to add a digital service on a physical product?

The smart phone serves as a medium

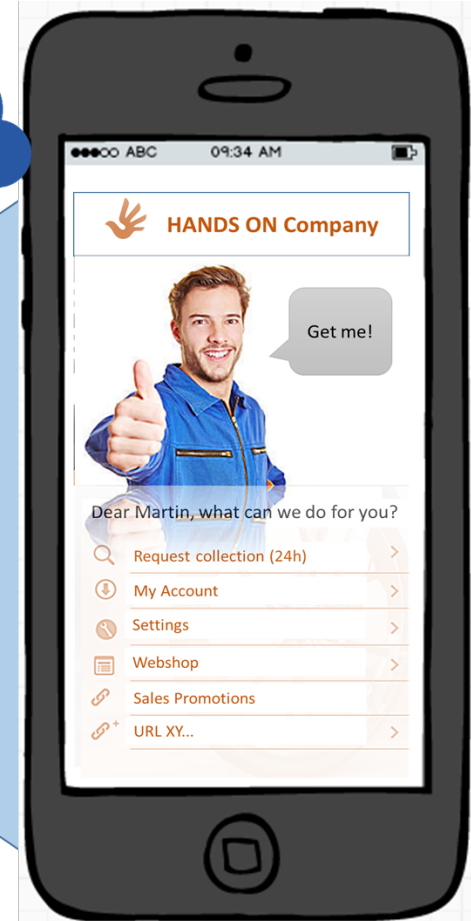

The intelligent service cloud

Use Cases

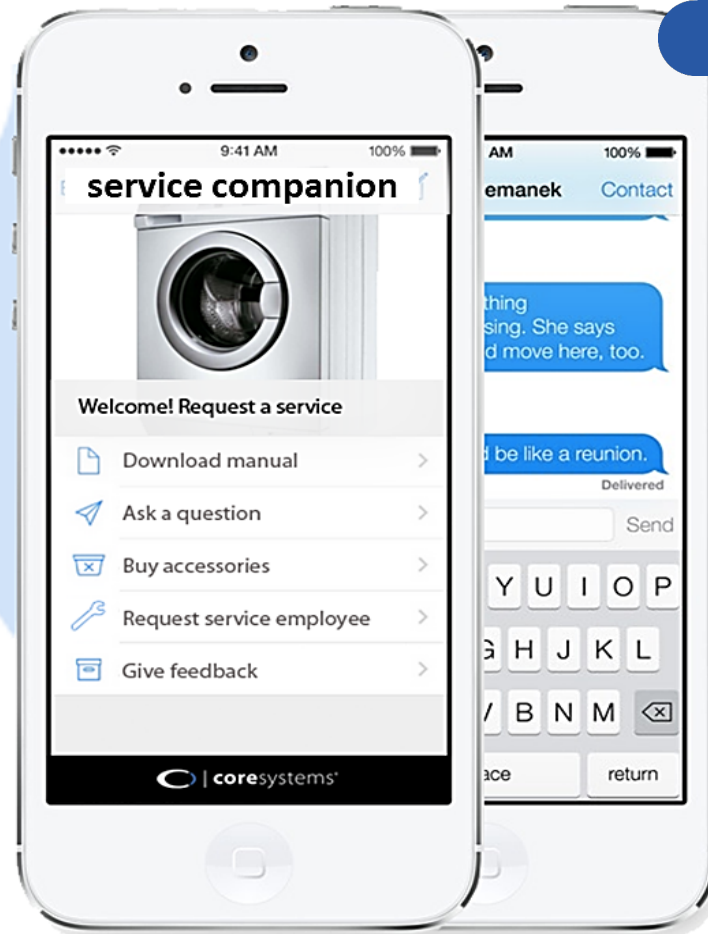

IoT reveals Self Services

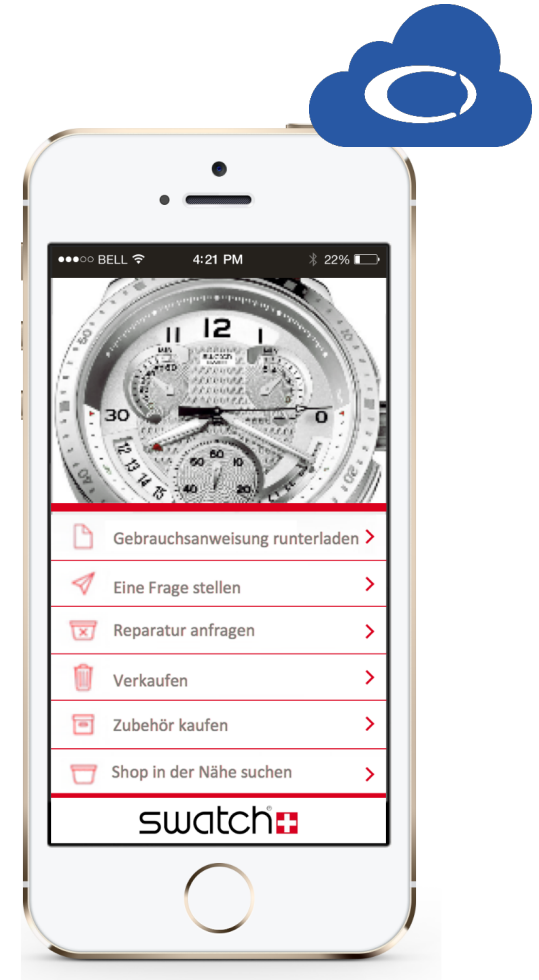

Grant customers access to individual services

QR
Code

Push upsells almost automatically

Simplify complex processes for employees

Summary

1. The IOT is not a revolution, it's an evolution
2. (Almost) every product will be connected
3. The IOT combines physical products with Internet products
> in order to do that cloud computing is essential
4. Internet products are services
5. Most manufacturing companies eventually will turn into service providers
> Digital business model patterns become relevant for manufacturing industries
6. Good service business can be very lucrative
7. Mechanical engineers and Internet software developers will fight for methods, time frames, and project lead
8. coresystems will help you adding digital services to your products and mobilize your business

Our customers

Almost 140,000 users throughout the world
trust coresystems every day.
